

— FOR IMMEDIATE RELEASE —

## **CXT University Holds First Class**

**Phoenix, AZ – April 25, 2008** – CXT Software, a leading-edge provider of same-day and expedited delivery software holds first CXT University end user training session.

CXT University is a set of highly focused two day training classes designed to give customers a more in depth look at X Dispatch and X Route, focusing on best practices and in-depth business case scenarios. The classes which have limited enrollment are taught by CXT Software's expert developers, trainers and managers. The first class which was held April 21st and 22nd filled almost immediately creating a need for a second class to fill the wait list.

CXT University training classes are held at CXT Software's corporate headquarters in Phoenix, AZ. "CXT University fills a training gap that develops within six months of users' initial training in the use of our enterprise software," said Dan Calderone, President of CXT Software. "With most large and comprehensive software applications, there are advanced features that get overlooked by newly trained users. CXT University is designed to address the recurring training needs of these advanced X Dispatch and X Route users"

"CXT University is just another example of your commitment to help our business succeed. We walked away a better company after attending. CXT University explained and demonstrated software solutions to many of our everyday logistical problems. I now have better understanding of the powerful tools and features integrated within X Dispatch," said Shelly Miller, Owner of Dependable Express.
